

-ENGLISH-

Regenerating Lotion

- Hair regenerator.
- Boosts bulb stimulation, growth and strengthening.
- Activates the scalp's intradermal microcirculation.
- Reduces the effects of dihydrotestosterone (DHT).
- Supports homeostatic and angiogenic properties.
- Acts on cellular activity.
- Balancing and regulating.
- Balances the microbiome, regulates sebum production, soothes itching and lessens flaking.
- Has antibacterial and antifungal properties.
- Keeps the scalp's pH balanced, locking in moisture and protecting it from pathogenic microorganisms and pollutants.

1. INGREDIENTS:

Equisetum Arvense Extract, Aqua, Isopropyl Alcohol, Glycerin, Arnica Montana Flower Extract, Tea-hydroiodide, Panthenol, Azelaic Acid, Menthol, Lactococcus Ferment Lysate, Mentha Piperita Oil, Sodium Pca, Sodium Lactate, Arginine, Aspartic Acid, Pca, Glycine, Alanine, Serine, Valine, Proline, Threonine, Isoleucine, Sodium Benzoate, Phenylalanine, Histidine, Sodium Hyaluronate, Phenoxyethanol, Potassium Sorbate, Benzyl Alcohol.

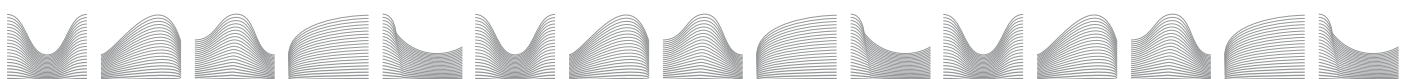

2. PRODUCT DATA SHEET:

PH of 6

- **TR10 REGENERATING COMPLEX:** Next-generation cocktail of active ingredients with regenerating, balancing, moisturising, and nourishing properties based on the most recent research findings on the scalp, hair and hair follicle. Its action is based on the following main active ingredients:
 - **PRORENEW COMPLEX:** Natural and vegan probiotic active ingredient obtained through biotechnology from a lactococcus lactis lysate whose main function is to balance the skin microbiome, resulting in a noticeable improvement to the scalp. It reduces sebum production, soothes itching and lessens flaking.
 - **AZELAIC ACID:** It's naturally found in many cereals. It has bactericidal properties. It exerts a keratolytic effect, which improves the absorption of the other active ingredients found in TR10 Regenerating

Lotion, and is a potent inhibitor of 5 α -reductase, the main enzyme responsible for androgenetic alopecia.

- **PRODEW 500:** It's derived from pyroglutamic acid, which is found in wheat, sugarcane and many other plants. It's part of the skin's natural moisturising factor, so it has a powerful moisturising effect on the scalp aside from enhancing the penetration of TR10 CAPILAR SOLUTION's other ingredients. It's composed of the following active ingredients:
 - » **ARGININE:** It's an essential amino acid that's a component of proteins, including keratin. It's actively involved in hair growth and development. Due to its vasodilator properties, it boosts circulation in the hair follicles, promoting the supply of nutrients. It helps to absorb potassium, a mineral that's vital to keeping hair healthy. It also has antifungal, antibacterial, healing and anti-inflammatory properties.

» **SODIUM LACTATE:** It's derived from lactic acid, an alpha hydroxy acid that's obtained through the fermentation of sugars from corn, potato or molasses. It's part of the skin's natural moisturising factor, and its main function is to keep the skin's pH balanced and to protect it from external factors such as pathogenic microorganisms and pollutants.

» **COMBINATION OF AMINO ACIDS:** The combination of amino acids is involved in maintaining and retaining optimal moisture levels in the scalp and hair.

- **MINT ESSENTIAL OIL:** It boosts circulation and exerts an antibacterial and antifungal effect.

- **ARNICA EXTRACT:** With its anti-inflammatory and circulatory properties, it improves scalp health.

- **TEA-HYDROIODIDE:** It's an essential element for hair development and it also exerts a powerful antifungal action against fungi that can damage the hair follicles and scalp. It's actively involved in hair growth and resistance.

• **EQUISETUM:** Horsetail extract or equisetum extract has the following properties: elasticising, astringent, sebostatic, anti-radical and anti-pollution, as well as remineralising.

• **LMW (Low Molecular Weight 300 KD) HYALURONIC ACID:** Low-molecular-weight sodium hyaluronate: It is one of the main components in several body tissues and fluids, half of which are in the skin. Thanks to its exceptional physical properties, it plays a key role in dermis structure and organisation, which means it is essential for regulating skin hydration.

It's obtained from a natural substrate of wheat through biotechnology. Its main function is to keep skin hydrated and prevent transepidermal water loss (TEWL) thanks to its amazing capacity to retain water and maintain homeostatic balance. Thanks to its angiogenic properties, it also stimulates blood vessel growth.

• **ALPANTHA:** Natural molecule formed by a synergy blend of:

- **PANTHENOL:** It penetrates into hair and transforms into pantothenic acid, which is vital for hair health and growth. It promotes cell regeneration and locks in moisture, improving hair elasticity and softness.

- **ALLANTOIN:** It has a gentle keratolytic effect on the scalp, stimulating basal cell proliferation. It remains active for long periods of time, maintaining moisture levels and protecting hair from external conditions. It reduces the risk of hair breakage after combing by between 30% and 40%. It repairs hair damaged by chemical and/or mechanical treatments.

3. AETIOLOGY:

HAIR:

ALOPECIA: TR10 CAPILAR SOLUTION is indicated for the treatment of all kinds of non-scarring alopecia, aside from slowing down and delaying any scarring alopecia that is already irreversible

- ANDROGENIC ALOPECIA
- ALOPECIA AREATA
- ALOPECIA OR SEASONAL HAIR LOSS
- DEFICIENCY-RELATED ALOPECIA
- POSTPARTUM, TRAUMATIC, TOXIC, POST-FEBRILE, POSTOPERATIVE AND STRESS-INDUCED ALOPECIA,
- HAIR DISORDERS AND LACK OF VITALITY.

SKIN: TR10 CAPILAR SOLUTION delivers an effective solution to different skin problems that affect the scalp, which can lead to alopecia.

- EXCESS OIL (SEBORRHOEA).
- TAUTNESS AND TIGHTNESS.
- HYPERSENSITIVITY (Irritation, itching and pain).
- FLAKING PROCESSES (Pityriasis or dandruff, dermatitis, psoriasis, etc)
- INFLAMMATORY STATES.

4. MECHANISM OF ACTION:

Topical preparation in the form of a solution, with a completely natural composition with no side effects, indicated for the treatment of all kinds of hair and skin problems that affect the scalp.

Excellent hair regenerator that stimulates and normalises the hair follicles in a degenerative phase, preventing a shortage of bulbs and getting rid of skin tautness, dermatitis and itching.

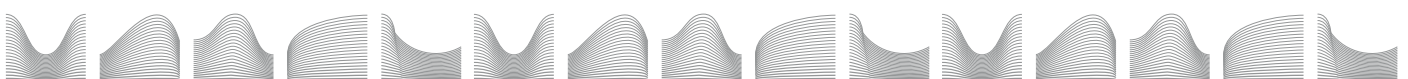

It contains a special cocktail of active ingredients (nutrients) that work in synergy to boost bulb stimulation, growth and strengthening, while activating intradermal microcirculation to the scalp.

It balances the scalp microbiome, stimulating the immune system of the skin.

It reduces the effects of dihydrotestosterone (DHT), the hormone responsible for the reduction in size of the hair follicles and hair (miniaturisation), which leads to the disappearance of the bulbs and the scarring of the hair follicles. These androgens accelerate the growth cycle of hair follicles, exhausting their regenerative capacity.

It delivers an effective solution to different problems that affect the scalp, which can trigger hair loss conditions. It gets rid of skin tautness, allowing the bulbs to develop in a healthy, relaxed and balanced scalp.

In alopecia areata, it enables hair to grow back in record time, activating the hair follicles that are still alive and restoring the bulbs in a degenerative state of atrophy.

TR10 CAPILAR SOLUTION is based on and formulated under the principles of NATURAL BIOCOSMETICS:

- **100% NATURAL ACTIVE INGREDIENTS.**
- **SULPHATE FREE.**
- **PARABEN FREE.**
- **COLOURANT FREE.**
- **ALLERGEN FREE.**
- **WE DON'T TEST ON ANIMALS.**
- **NEXT-GENERATION FORMULATION.**

5. HOW TO USE:

TR10 CAPILAR SOLUTION is for home use under professional supervision.

Apply to scalp (+/- 15 pumps) and the roots, focusing on the most affected areas and gently massage in so it is absorbed more quickly. Do not rinse.

The general guidelines to follow, while bearing in mind the severity of the problem, are:

- For the first 15 days, apply twice a day, preferably in the morning and evening/night, as an intensive treatment.
- After the first fortnight until the third month, apply once a day, preferably in the evening/night.
- Once treatment has ended, apply 2 to 3 times a week as maintenance treatment, preferably after washing hair.
- Treatment should be ended or suspended gradually.

- It is advisable to use it as a preventive treatment.

In alopecia areata, during the first month, apply to the affected area three times a day and to the rest of the head once a day.

In patients with micrografts, to stimulate new hair bulbs and to normalise the scalp damaged by the grafts, treatment should be started two or three months after the procedure. It is also advisable to use it prior to the procedure all over the scalp to strengthen and stimulate it.

Thanks to its natural formulation, a possible overdose would not be counterproductive in any case. It has no side effects.

Its tea-hydroiodide content does not contribute towards increasing iodine levels in the blood in patients with thyroid disorders.

6. PRESENTATION:

125 ml container with a special spray dispenser for easy application, in an individual box.

7. WARNINGS:

Do not swallow.
Keep out of reach of children.
Shake vigorously before using.
Store in a cool, dry place.
